Professional Experience

Software Engineering Intern (On-Site) — Fenger Gruppe, Germany

09/2025 – 10/2025

Completed a two-month on-site internship at a German mid-sized group operating in construction, raw materials, and logistics, contributing to both operational and strategic functions across departments.

- Contributed to IT and digitalization initiatives, supporting the development of management and control processes across construction, raw materials, and logistics divisions
- Analyzed, structured, and optimized internal business processes, supporting cross-departmental coordination between logistics, operations, and administration
- Managed contract documentation including lease, loan, and service agreements, ensuring accuracy and structured document handling
- Prepared internal reports, analyses, and executive overviews to support strategic decision-making by senior management
- Supported invoice verification and preparatory accounting tasks, contributing to financial accuracy and compliance

Technical Project Experience

Takhlees — B2B2C Marketplace Platform

2026

- Built and shipped a full-stack B2B2C marketplace digitizing port clearance services across major Egyptian ports, deployed on Vercel and supported by companion React Native mobile applications for both importers and clearance companies.
- Developed a full-stack MERN application React.js front-end, Node.js/Express REST API, and MongoDB database featuring secure authentication and multi-tier payment workflows across 3 user roles
- Shipped a React Native mobile app for importers: users can view their submitted clearance applications and present a dynamic QR code that companies scan to confirm and fulfill shipments
- Built a dedicated React Native mobile app for clearance companies with two core tabs: an Applications tab showing real-time pipeline (Pending, In Progress, Completed) and a Scanner tab for QR code scanning to advance shipment status
- Authored complete technical documentation (BRD, SRS, ERD, UML diagrams) and designed the business model, revenue streams, and go-to-market strategy

RepSay — AI-Powered Intelligent Workout Logging System, Live on the iOS App Store

2026

- Shipped a cross-platform Flutter fitness app to the iOS App Store, powered by AI speech recognition that converts voice input (English and Egyptian Arabic) into structured workout data in real time
- Implemented automated workout categorization (Strength & Conditioning, Hypertrophy, Endurance) by extracting exercises, sets, reps, and weights from transcribed audio
- Architected the backend with Supabase for secure authentication, relational database management, and scalable cloud storage of workout session

Bitcoin Price Prediction

2025

- Developed a machine learning model to predict Bitcoin prices using historical minute-level data
- Implemented and compared Random Forest and Gradient Boosting algorithms, applying data cleaning, feature engineering, and model evaluation
- Demonstrated proficiency in time-series analysis, predictive modeling, and quantitative finance using Pandas, NumPy, and Scikit-learn

Education

Dual B.B.I.S. Degree in Business Information Systems

2022 – 2026

University of Northampton (UK) & Arab Academy for Science, Technology & Maritime Transport GPA: 3.78, Excellent With Honors

Extra-Curricular

RobEn, PR & Marketing Member

10/2022 – 03/2025

- Interviewed and evaluated 50+ candidates during recruitment cycles, demonstrating leadership, communication, and decision-making skills
- Represented the university at the ICT event, showcasing public speaking and networking abilities
- Supported PR and marketing campaigns, contributing to team collaboration, strategic thinking, and relationship management
- Assisted in securing sponsors and promoting events, highlighting negotiation, creativity, and problem-solving

Technologies

- **Programming:** Python, JavaScript, Java, PHP
- **Frontend:** React.js, Flutter, HTML, CSS, Tailwind
- **Backend & Databases:** Node.js, Express, MongoDB, Supabase, MySQL, Oracle Live SQL, phpMyAdmin
- **Data & ML:** Pandas, NumPy, Scikit-learn (Random Forest, Gradient Boosting), Matplotlib, Seaborn
- **Tools:** Git, GitHub, Power BI, Excel

Courses

Google Data Analytics Professional Certificate (In Progress), Google

Python Data Structures, University of Michigan

German Language – A1 Level, GUC
